Military Service: Completed (Exempted) | Location: Giza, Egypt (Open to remote and on-site opportunities)

Summary

Front-End Developer (React) building responsive and accessible web applications with seamless REST API integration and modern state management. Specialized in React.js, TypeScript, Redux Toolkit for scalable global state, performance optimization using Tailwind CSS, and AI-assisted tools like Cursor and GitHub Copilot. Delivered user-focused interfaces with semantic HTML and ARIA standards, collaborating effectively with teams to create maintainable, production-ready solutions while eager to grow in dynamic environments.

Education

Higher Institute for Specific Studies 2019 - Sep .2023
Bachelor's Degree in Management Information Systems.

Leadership / Extracurricular
Student Union President 2022 - 2023

- Led the Student Union for one year, organizing academic and social initiatives, representing student interests, and coordinating with the university administration.

Experience & Projects

To-do List App [Live]

- Developed a fully functional Todo List using **React.js (JSX)**, featuring task progress tracking (%), completion status, edit/delete functionality, and local state management with useState/useEffect.
- Implemented responsive UI with CSS Grid/Flexbox.
- Added persistent storage with localStorage and JSON handling, Could 100+ tasks.

Calculator [Live]

- Built an interactive calculator app from scratch using **React.js (JSX)**, handling complex operations (add, subtract, multiply, divide) with real-time state updates via useState and event handlers.
- Designed intuitive, CSS animations for button feedback and smooth transitions, improving user engagement and UX.

Z-Fashion (Landing Page) [Live]

- Developed a responsive single-page website for a fashion brand using **HTML & CSS**.
- Key features: Clean, modern design with intuitive navigation, mobile-friendly layout for seamless
- Organized product sections segmented by categories (Men's, Women's, Junior) for intuitive navigation
- Multimedia integration using native HTML5 elements without JavaScript

Jorum. [Live]

- Built a full multi-page restaurant site using **HTML & CSS**.
- Pages: Home, Menu, Reserve, Events, Contact Us, Our Story.
- Fully responsive (mobile-first, Flexbox/Grid for all devices).
- Clean, elegant UI: Google Fonts, high-res images, gradient backgrounds.

Technical Skills

Core Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frontend Frameworks & Libraries: React.js, Redux Toolkit, Tailwind CSS, Material-UI

Architecture & Best Practices: Component-Based Architecture, Responsive Design, CSS Grid/Flexbox, Performance Optimization, Accessibility (ARIA, Semantic HTML, WCAG Basics), CSS Animations

State Management: Redux Toolkit, React Hooks (useState, useEffect, useContext, useReducer)

APIs & Integration: RESTful APIs, JSON Handling, API Integration, Error Handling

Tools & Platforms: Git, GitHub (Branches, Pull Requests), VS Code, Postman (Basics), Vercel

AI-Assisted Development: Cursor, GitHub Copilot

Workflow & Collaboration: Agile Basics, Code Reviews, Debugging

Language

Arabic: Native

English: Proficient
